

# EEG Models

---

We have two models of Biosemi A/D-boxes. Two are the newest ActiveThree's and the remaining five are ActiveTwo's/Active2.5's.

## ActiveThree

Two rooms of B-447 (A & B), make use of the newest [BioSemi ActiveThree](#) systems. These work primarily the same as the older system, but have slight differences in procedure. On the desks for these rooms, [instructions](#) are placed; please make sure to read these! You can also find these in the "*Attachments*" section next to this chapter.

## ActiveTwo/Active2.5

The remainder of the rooms make use of the [BioSemi ActiveTwo/Active2.5](#) systems.
