Guide to this Book!

This website works in a different way than the old Brain & Behaviour information website. Here we explain how and give tips on how to navigate it well.

The structure is quite intuitive. You have **books** - in this case the "Brain & Behaviour Lab"; **books** have **chapters** and **chapters** have **pages**. Most detailed information is written on a **page** and every **page** has an "Attachments" section to the left side. These are attachments that are downloadable for public users.
