Shared Mail List

Here we share important information about the lab, and keep you updated about news/changes in the lab. On the web page you have the possibility to subscribe to this list.

You can get started by subscribing to the shared mailing list for lab users.
Instructions on how to use the list will be provided. Unsubscribing is possible at any time.

The shared mailing list also provides the possibility to ask questions or provide info to all lab users by solely one e-mail. Researchers and students are all able to join, **a VU e-mail address is not needed.**
